Junior Full-Stack Developer | React • Node.js • MongoDB | 3 Deployed MERN Projects

Professional Summary

Self-taught Full-Stack Developer with 3 production-ready MERN stack applications. Recently built and deployed CalorieBank, a full-featured calorie tracking platform with personalized TDEE calculations, daily banking logic, and AWS S3 photo uploads — developed efficiently using AI coding tools to accelerate development.

Previously built SpendWise (personal finance tracker) and Habit Tracker (full-stack app with JWT authentication). Strong in React, Node.js, Express, MongoDB, Tailwind CSS, and cloud deployment. Actively seeking a Junior Full-Stack or Frontend Developer role in Houston or remote.

Technical Skills

- Frontend: React, React Router, Context API, Tailwind CSS, Vite
- Backend: Node.js, Express, REST APIs, JWT Authentication, Mongoose
- Database: MongoDB (Atlas)
- Cloud & Tools: AWS S3, Vercel, Render, Git/GitHub
- Other: Responsive Design, Dark Mode, File Uploads, Debugging

Technical Projects

CalorieBank — Full-Stack Calorie Banking App

Live: <https://caloriebank-pi.vercel.app/> | *GitHub:* <https://github.com/PhilBKouokam/CalorieBank>

Feb 2026 – June 2026

- Built a complete calorie tracking platform featuring personalized TDEE calculation and daily/weekly "calorie banking"

- Implemented secure JWT authentication, protected routes, and user profile-based calculations
- Designed and deployed daily food logging with macros (protein, carbs, fats) and optional AWS S3 photo uploads
- Developed automatic bank balance logic (TDEE + extra burn - intake) with date-normalized daily logs
- Leveraged AI coding tools to significantly accelerate component development and debugging
- Delivered a responsive, dark-mode UI using React, Tailwind CSS, and Context API

SpendWise — Personal Finance Tracker

Live: <https://spendwise-two-navy.vercel.app/> | *GitHub:* <https://github.com/PhilBKouokam/spendwise>

March 2026 – May 2026

- Built a full-stack personal finance tracker with income/expense categorization and AWS S3 receipt uploads
- Implemented authentication, protected CRUD operations, and real-time balance calculations
- Created interactive dashboard with Recharts visualizations and dark mode support

Habit Tracker — Full-Stack MERN Application

Live: <https://habit-tracker-fullstack-ten.vercel.app/> | *GitHub:* <https://github.com/PhilBKouokam/habit-tracker-fullstack>

Jan 2026 – March 2026

- Developed and deployed a complete habit tracking app with user authentication and protected CRUD operations
- Implemented React Context for global state management and JWT-based authentication
- Successfully troubleshooted and resolved complex deployment issues (CORS, environment variables, MongoDB Atlas)

Education & Certifications

IBM Front-End Developer Professional Certificate

IBM | August 2025 – December 2025

AWS Certified Solutions Architect – Associate

Amazon Web Services | January 2026 – Present (In Progress)

Self-Taught Full-Stack Development (MERN Stack)

Remote | October 2025 – Present

Technical Skills

Frontend: React, React Router, Context API, Tailwind CSS, Vite

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Mongoose

Database & Cloud: MongoDB (Atlas), AWS S3

Tools: Git/GitHub, Vercel, Render **Other:** Responsive Design, Dark Mode, File Uploads, AI Coding Tools
